although underwater archaeology has assumed its rightful place as an important subdiscipline in the field the published literature has not kept pace with the rapid increase in the number of both prehistoric and historic underwater sites the editors have assembled an internationally distinguished roster of contributors to fill this gap in addition to both geographical and topical approaches the chapters also focus on technology law public and private institutional roles and goals and the research and development of future technologies and public programs

with the exception of oceans boundaries are artificial man made divisions of geography that many times make little sense and sometimes no sense at all for example why does the northern boundary of minnesota protrude into canada why does west virginia have two panhandles why do pennsylvania and delaware have a common boundary that is a circle segment why do the boundaries of colorado wyoming and utah consist entirely of lines of latitude and longitude the answers to these questions and many more can be found in this book which explains why and how state boundaries are placed where they are it begins with an introduction that provides general information about boundary placement colonial boundaries formation of territories surveying and supreme court rulings the 50 states are divided into ten regions new england mid atlantic upper south lower south great lakes north central south central rocky mountain west and noncontiguous the text for each state begins with an overview of that state s boundaries that becomes more specific as its different boundaries are considered the appendices include interesting facts about each state citizen and state nicknames and dates territories were created and states entered the union richly illustrated with 138 maps
